

All our products
are manufactured from
recycled waste plastic

Who are we?

AGRI PLASTICS RECYCLING background dates back nearly 20 years. As a business initially involved in the collection and cleaning of waste plastics, it was vital to help our customers understand the value of the waste plastics they were previously burying and burning, and to understand what amazing products their waste could be manufactured into.

Today from the waste plastic we offer an incredibly varied range of products, including plastic lumber, fencing materials, decking, furniture, and these are offered to both trade and public sector customers throughout the UK, Europe and beyond.

We put our success down to the values that are important to us – an excellent customer service combined with friendly and knowledgeable staff to help our valued customers every step of the way.

100%
RECYCLED

OUR QUALITY PRODUCTS – As with traditional timber, there is a wide range of purchase options available to customers. It is important to remember that not all recycled plastics are created equal ! At Agri Plastics Recycling we are very aware that the raw materials used reflects in the strength and durability of the end product. The recipe must be right to ensure we offer a high quality 100% recycled product range.

Why choose 'Rubbish' Products? We all need to care about the environment and the effect our waste has upon it. Plastic is a fantastic product that we all use in our everyday life - but we need to ensure that it doesn't end up in our seas. Burning and landfilling is not a solution.

In choosing to use recycled plastic products we drive forward the reuse of plastic waste, and we choose a product that will bring us long term maintenance free solutions. Products that don't need replacing in the future as they can not rot – but if we choose to replace them – they can be fully recycled again!

Benches

Moulded Benches

This stylish recycled plastic bench has a robust moulded base and is manufactured from 100% recycled plastic. Featuring a slight recline in both the seating and the bench back provides a comfortable outdoor seating option.

Weight: 90kgs (1.5m bench)

Dimensions: Standard length is 1.5m long with options of 2m and 3m available.

Colour Options: The base frames are Black with a choice of Black, Brown, Grey and Bright Colours available for the remainder of the bench.

Litter and Recycling Bins

Our range of litter and recycling bins offer a long term solution for waste disposal needs in a variety of areas from parks to town centres.

The Quad Recycling Unit is manufactured as a single unit with four segregated waste streams.

The Modular Waste/Recycling Bin is offered as a single, double, triple or quadruple unit.

Both ranges come with galvanised liners and can be fixed to the ground either at their base or with the addition of extended legs.

Bespoke signage is available for each unit.

Plastic Lumber and Decking

We have a wide range of recycled profiles which can be used in a variety of applications. Used widely by many organisations in both the private and public sector. Its versatility of design allows it to be used in furniture, fencing, walkways signage and many more products.

Colour Options: Black, Brown, Grey, Green and a range of bright colours.

Due to the long lifespan of our materials, we strongly recommend using good quality screws and fixings whilst allowing adequate support and expansion gaps on installation.

Permanent Base Construction on Sand Dunes.

Fencing

Our significant range of recycled profiles allow the construction of a wide range of fencing options.

Recycled plastic materials can be used in conjunction with more traditional materials such as concrete and metal.

The variety of profile options allow our products to blend naturally into any environment.

Picket Fencing

Sections used in picket fencing can be Black, Brown, Grey, or Bright colours.

Please see our fencing guidelines document for assistance on construction and options of profiles.

Please see our fencing guidelines document for assistance on construction and options of profiles.

Post and Rail

“Our variety of plastic profile options allow our products to blend naturally into any environment”

Our significant range of recycled profiles allows construction of a wide range of fencing options including closed board finish and Birdsmouth and Knee rail fencing amongst others.

Birdsmouth and Knee Rail Fencing

Gates

A range of gates and styles can be produced to meet customers' specifications.

Gates can be produced in conjunction with a number of fencing options. Due to the weight of the profiles a maximum width of 900mm is recommended for gates unless supported with a metal framework.

Due to the long lifespan of our materials we recommend using good quality screws and fixings.

Planters and Raised Beds

Our wide range of planters and raised beds can be supplied in both semi assembled and fully assembled form.

They can be supplied in modular units to increase their size and can be manufactured with block feet or supplied with castors for ease of movement.

Planters are available with Castors.

Bollards and Signage

Using our recycled plastic profiles for signage, offers maintenance free long term solutions to many signage applications from Bollards to Golf Tees to Way Markers.

Our larger planters have been used as an attractive alternative to bollards for traffic management.

The plastic profiles can be routed, infilled or have plaques screwed onto them for the desired finish.

EKOply 8'x4' Recycled Plastic Sheet

Eco Friendly and Cost Effective

EKOply is a rot proof, sustainable, eco-friendly and cost effective alternative to non-renewable materials such as timber and plywood. With numerous application possibilities, it handles very similarly to timber yet requires little or no maintenance and is significantly longer lasting.

EKOply is a 2.440m x 1.220m sheet available in 19mm and 12.5mm thickness.

An anti-slip surface is available on the 19mm sheet.

Colour Options: The standard colour is Grey fleck. Also available in Green, Blue, White fleck and Speckled.

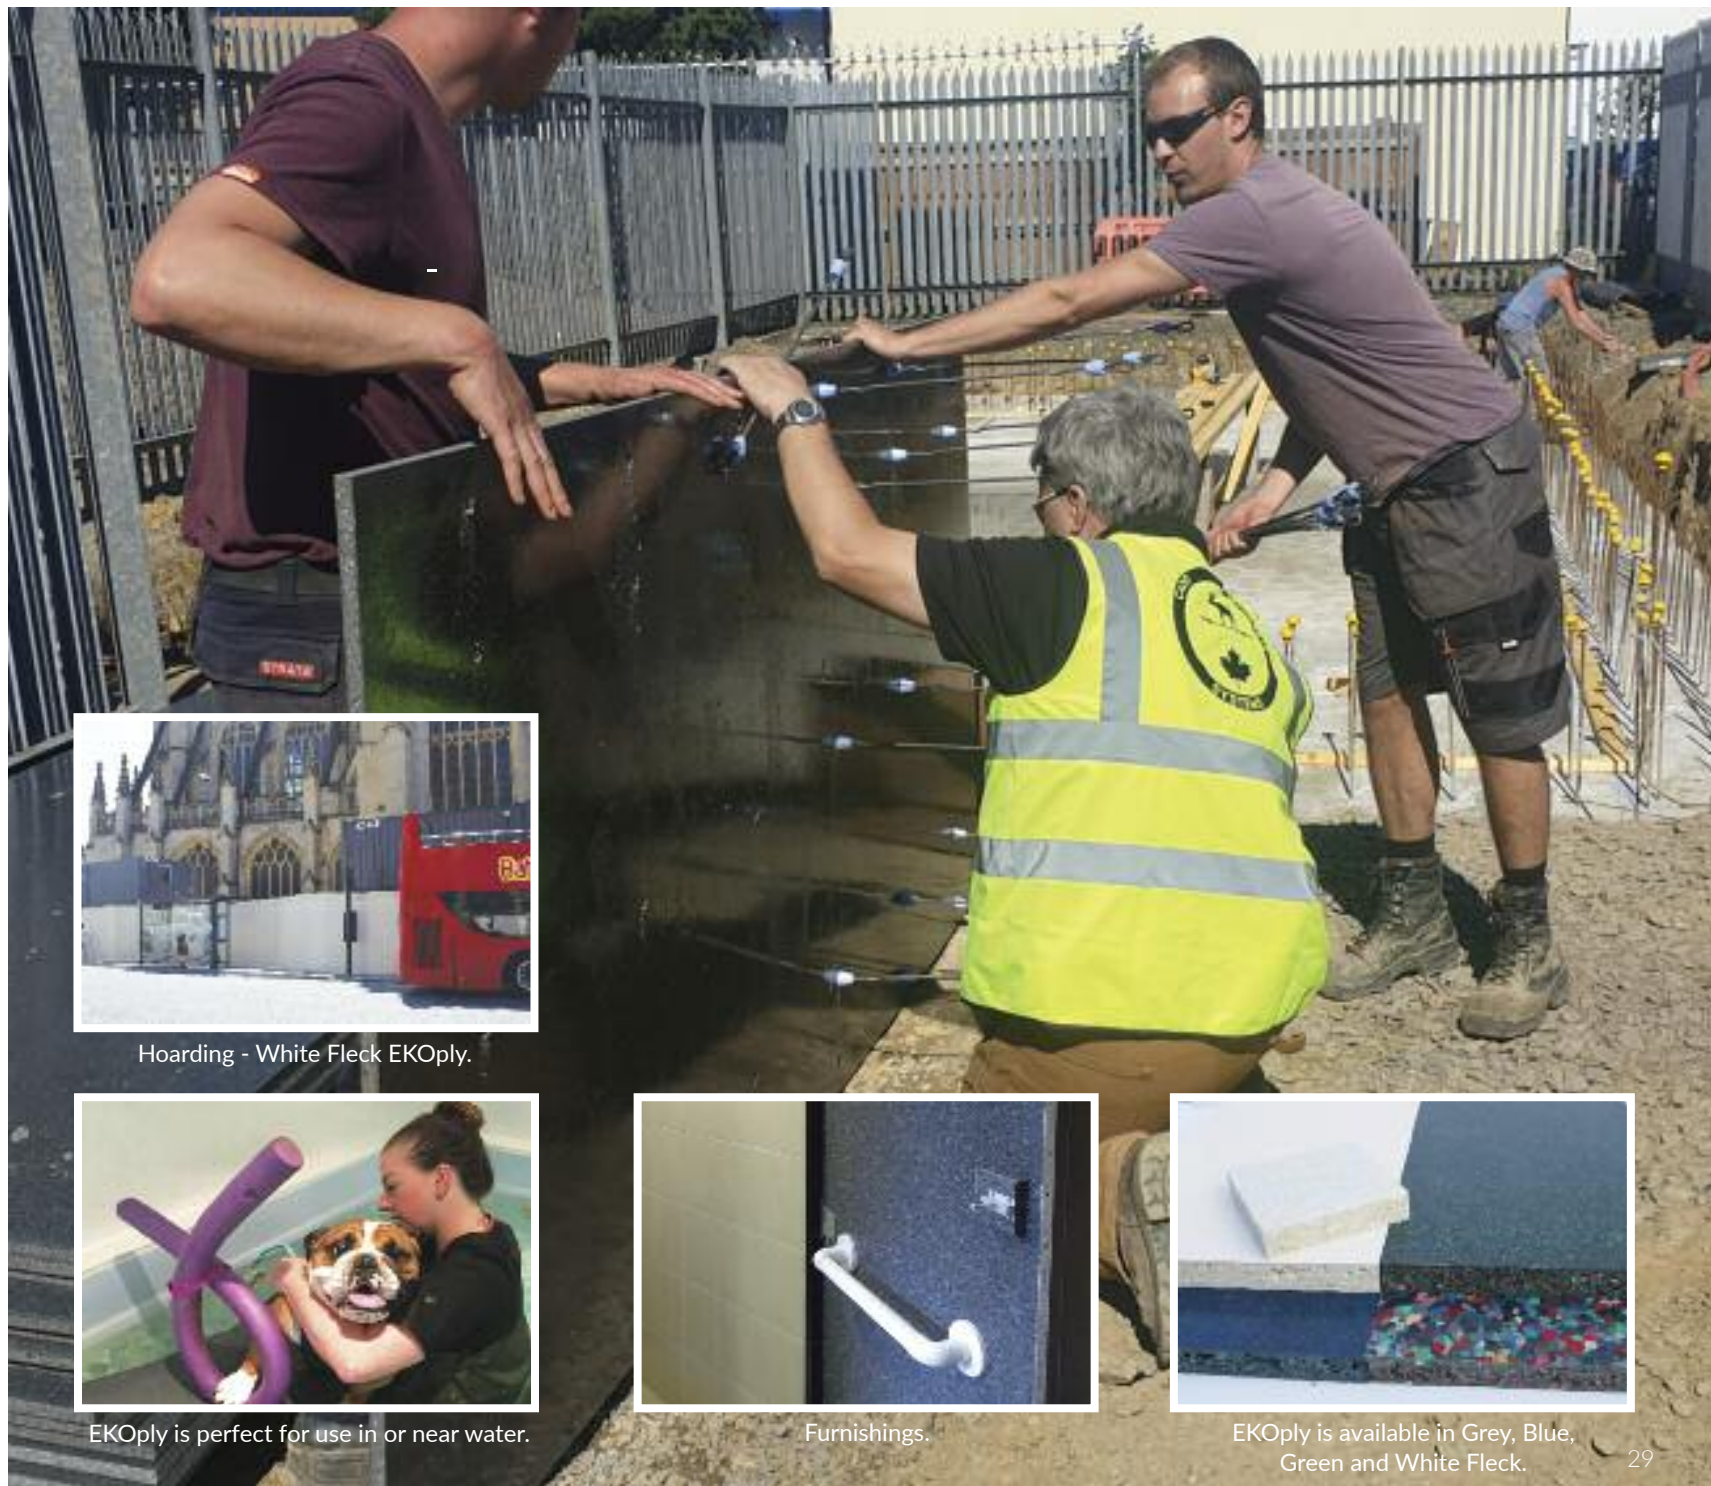

- Rot and weatherproof
- Tough and durable
- Graffiti proof
- No maintenance costs
- Chew resistant and non-toxic to animals
- Easy to cut and screw in the same way as plywood
- Significantly longer lasting compared to timber and plywood
- Acid and chemical resistant, resisting most industrial chemicals

EKOply Grey 19mm.

High Street Store Shelving.

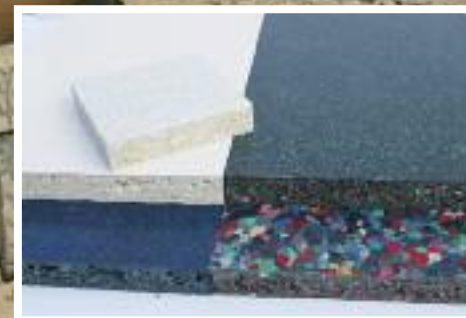

Hoarding - White Fleck EKOpoly.

EKOpoly is perfect for use in or near water.

Furnishings.

EKOpoly is available in Grey, Blue, Green and White Fleck.

Stokbord

Flexible Sheets

Stokbord is a flexible 2.440m x 1.220m recycled plastic sheet. Perfect for curved application, Stokbord is available in a range of thickness options.

Dimensions: 3mm, 6mm, 9mm and 12mm

- Rot and weatherproof
- Tough and durable
- No maintenance costs
- Chew resistant and non-toxic to animals
- Easy to cut and screw in the same way as plywood
- Significantly longer lasting compared to timber and plywood
- Acid and chemical resistant, resisting most industrial chemicals.

Stokbord
