

## UNIVERSITY OF READING

### University of Reading Award Air Liquide UK Drinks Dispense Gas Contract

The University of Reading is ranked in the top 1% of universities in the world. A global university that enjoys a world-class reputation for teaching, research and enterprise.

The University was established in 1892, received its Royal Charter in 1926, and has developed into a leading force in British and international higher education. Delivering a world-class student experience, research-led teaching with an excellent graduate employability record. The numbers of our students going on to higher level study is well above the national average.

The University continues to evolve, reflecting an ever-changing world, which drives the development the areas of research excellence and strength. Leading the way in multidisciplinary work in biomedical and pharmaceutical sciences, housed in a new £17 million centre.

The University is committed to maintaining a supportive, challenging and high-quality experience for students and staff alike and to preserving the heritage and beauty of some of the most beautiful university campuses in the UK.

*"We believe that drinks dispense gas should essentially be a very boring element of any on-trade business with the contracted supplier delivering as required and 'getting on' with everything without drama in the background to allow us to concentrate on operating and growing our business. We had several issues with our previous supplier, who controls the majority of the market, including non-delivery, poor and confrontational customer service. Eventually we decided to look at other suppliers and settled on Air Liquide due to their experience of drinks dispense gases, superior equipment and approachable staff."*

*Air Liquide conducted a site survey and around three weeks later switched all sites over in an orderly manner over five days. Install work was carried out to a high standard and the engineers were professional throughout. Since switching our drinks gas has become 'boring' again causing us no issues and the friendly team at Air Liquide resolving any teething issues promptly and without issue."*
