

**d+b facades**  
OVERCLADDING SPECIALISTS

Horton D Building, University of Bradford

Horton D Building, University of Bradford before

#### Client Testimonial

*"d+b facades have carried out two significant projects for the University of Bradford both of which have been completed safely to a requisite quality, on programme and within budget.*

*The first project was carried out over 5 yrs ago to two elevations of the 12 story Richmond Building. The second is in the throes of early completion and comprises full overcladding to a complete wing of the School of Computing, Informatics and Media, together with replacement curtain walling to the main staircase.*

*We have found that the aluminium cassette/NorDan window combination gives threefold value for money, the appearance of the facades is vastly enhanced, the airtightness is almost 100% and the insulation properties hugely improved".*

**Peter McCluskey**, Project Manager,  
Estates and Facilities
