TYPE OF CONTRACT JCT Design and Build 2011

CONTRACT VALUE £4m

PROJECT DURATION Jan 2013 – Feb 2014

PROJECT SCOPE

Bispham Campus is the largest campus at Blackpool and The Fylde College. Over time, the learning environment had been severely hampered by poor accommodation including leaking drafty windows, lack of temperature control and noise intrusion which impacted upon attendance, retention and student success.

In a phased refurbishment, the buildings have been transformed creating a contemporary learning environment with the same high performance as a new campus but for a fraction of the cost. Phase I of the project was the Cleveleys building, refurbished in 2012. Phase II of the project comprised four buildings - Elswick, Garstang, Poulton and Thornton including:

- 4,800m² of aluminium rainscreen overcladding, 2,700m² of high-performance replacement windows and 4,500m² of over-roofing
- Construction of two new link buildings to improve accessibility
- New service shaft
- Repairs to existing building fabric
- M&E works and landscaping
- All the above to achieve BREEAM 'Very Good'.

Client Testimonial

"A key component of our 10 year redevelopment strategy for the College has been the continued refurbishment of the Bispham Campus. Our experience of working with d+b facades on Phase I, Cleveleys building, was very positive and we were pleased to appoint them for Phase II following a second successful tender. For much lower cost than an equivalent new build, we now have a contemporary campus with high sustainability credentials providing a fit-for-purpose learning environment for decades to come.

d+b facades' experience and expertise has been important to the successful delivery of this challenging project. They understand the complex constraints of working on occupied buildings and the need to minimise disruption. Most importantly from a Client's perspective, they fulfil their promises.

John Pye, Project Director - College Capital Projects

Cleveleys building completed as Phase I in 2012 can be seen in the background with Phase II in the foreground

Phases I and II completed creating a revitalised campus with contemporary and consistent appearance

Elswick building main courtyard elevation with new build link

Existing Thornton Elswick low-level link

New-build Thornton Elswick link enhancing accessibility between buildings

Garstang building inner courtyard totally transformed
