June 2019  
University of Manchester

***Educators for sustainable development are constantly looking for innovative and engaging ways to influence student views about sustainability, enhance knowledge, and nurture a 'sustainability mindset' in the leaders of tomorrow (Rimanoczy, 2014). Following this workshop, participants will be in a position to make learning about sustainability fun and engaging by using an online multiple-choice quiz - the Suliquiz (Sustainability Literacy Quiz)! Suliquiz is part of a suite of learning tools, including one on the SDGs, freely available to educators for sustainability in further and higher education institutions around the world, and endorsed by the United Nations Higher Education Sustainability Initiative***
