- Partners – Linking back to partners of the Net Zero Academy

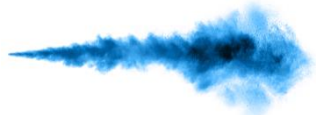

# Courses

Use of an interactive image to determine what courses relate to that image that are currently on offer

More to come!....

## Navigating Net Zero

---

### Our Goals

The UK Government has committed to reduce the UK's greenhouse gas emissions by 100% from 1990's levels by 2050. This would mean the amount of greenhouse gas emissions produced by the UK would be equal to or less than the emissions removed by the UK from the environment.

We recognise that we can achieve this goal together, our aim is to deliver what you need to ensure that your business is equipped with industry standard training, a knowledgeable workforce, and a strategy to reach Net Zero.

### What We're Doing

- We provide upskilling opportunities for Net Zero Technologies to businesses, organisations, and individuals to support you to become carbon neutral.
- We provide a comprehensive hub of Net Zero information, resources, and news.
- We grant access to funding sources to allow you to upskill at minimal cost.

# Net Zero Academy – Live projects

Welcome To  
Building Net Zero in the Region

A project funded by the MCS Charitable Foundation.
