

Learning Network 'Sustainability in Teacher Training'

Organising institution:

Ecocampus, a project of the Government of Flanders Department of Environment, Nature and Energy

Abstract:

Network for and by lecturers from teacher training programmes and interested parties from civil society. This learning network exchanges knowledge and builds expertise in education for sustainable development in the curricula of teacher training programmes.

Description:

Network for and by lecturers from the teacher training and interested parties from the field.

This learning network exchanges knowledge and builds expertise in education for sustainable development in the curricula of teacher training programmes.

This is done, among other things, by exchanging experiences and teaching methods and materials. During the last two years (2013-2015) intensive work has been done to create a publication containing a variety of backgrounds and practical examples that are linked to the developed ESD principles (see action 2.2). To that end, two meetings will be organised for each ESD principle to generate both input and output for each principle.
