Find out more about fair trade at Public University of Navarra, Spain

What is your institution currently doing about fair trade and working conditions in supply chains? (procurement and product sales, awareness-raising, research, teaching, other?)

Fair trade is included in our teaching offer but only for students who take part in Cooperation for Development activities at UPNA; we have an own programme that let students to involve themselves in a cooperation for development project in Latin America or Africa countries. Some of these projects are directed by fair trade organizations.

On the other hand, we have a very small offer of products in coffee machines at university, but this is an initiative of the vending machine's company.

What plans do you have, or what would you like to do in future regarding fair trade in your institution?

I would like to implement a programme to introduce fair trade at University in a transversal way: teaching, researching, public ethical purchase, etc,
