

AIMS:

- To maintain interest and widen understanding for projects.
- Groups to consider how to research,
- Identify jobs for group members
- Identify contacts potential
- Identify any help needed from JH, AA or other?

ACTIONS:

- To maintain interest the groups were shown the You Tube video sustainability clips including "300 years of fossil fuels in 300 seconds".
- There was some discussion around this and how it made the students feel. Viewed as an opportunity for change not the end of the world

STUDENT TASKS:

- Form a plan of action:
 - What information do groups need for projects?
 - How to research, on-line, visits, interviews etc
 - Who do groups need to contact, identify specific people, write letter(s)
 - Carry out visits
 - Who will carry out each task – identify group member
 - What help do individuals or group need to complete the tasks?
 - Think about timescales and fitting research around other college work
