

**AIMS:**

- To develop greater awareness through increased information about why sustainable development is needed, including increased understanding about the economic, social and environmental impacts and considerations
- Increased partnership working between the college and organisations involved in sustainable development to share expertise and knowledge relating to sustainable development, and specifically for Sustainable Education Visits as part of the new Enrichment Programme
- Stimulate behaviour change
- Develop a cultural change within the organisation as a whole by encouraging students to become sustainability champions.
- To develop individual skills in areas such as:
  - Producing presentations
  - Analysing statistics – producing graphs
  - Presentation of statistics
  - Compiling questionnaires
  - Letter writing
  - Improved team working
  - Confidence building

**GROUP TASKS:**

To continue with work outlined in week 5 while developing skills in line with the aims outlined above. Individual and group work to be completed with the assistance of class tutor, Estates/Sustainability Manager and Catherine LRC (IT) support to enable final project power point presentations to be completed by deadline date.
