

# Sustainability Day for Students and Lecturers

## Organising institution:

University college PXL

## Faculty/Department/Programme/External partners:

The Department PXL-Tech of university college PXL offers four technological courses

## Abstract:

Every two years PXL-Tech organises a Sustainability Day for students (compulsory for students in the first and second years) and lecturers. It concerns students and lecturers from the programmes 'Agro- and Biotechnology', 'Construction', 'Electromechanics', and 'Electronics-ICT'.

## Description:

Every two years, PXL-Tech organises a **Sustainability Day**.

During this Sustainability Day students and lecturers are given the opportunity to familiarise themselves with all kinds of themes relating to sustainability, including sustainable use of materials, sustainable construction, sustainable living, biodiversity, sustainable nutrition, etc. To that end, **lectures and workshops** are presented by relevant specialists and a **sustainability fair** is organised which remains open throughout the event.

At noon a **sustainable meal** is served for the price of a plat du jour. The Sustainability Day ends with a **sustainability café** where you can talk in small teams about specific topics relating to sustainability.
